Emerson Bearing Announces Dedicated Power Generation Division

MARCH 14, 2011: BOSTON, MA...

[Emerson Bearing](#), catering to OEM (Original Equipment Manufacturers) and MRO (Maintenance, Repair and Operations) markets throughout the U.S. and abroad, has announced a Power Generation Division dedicated to accommodating the unique bearing and related product needs of utilities.

Emerson Bearing's Power Generation clients include Coal and Gas fired Electric utilities stretching from the Northeast to Guam, Bermuda and the Caribbean. Rick Piracini, Marketing Specialist and industry expert at Emerson Bearing, oversees this new division and assists clients in determining which bearing technologies would be most suitable by taking into consideration the specifications, recommendations, maintenance strategies, fatigue life and wear resistance of the bearing in relation to the application.

Power generation requires uninterrupted bearing service. Emerson's 24/7 service and inventory are critical to the operations of utility clients. The ball and roller bearings for the pumps, compressors, electric motors and drives must meet critical internal clearances, cage designs and Abec precision class. Emerson's inventory includes [Split Bearing Pillow Blocks](#), Cylindrical Roller Bearings, Ball Bearings, Type E Pillow Blocks, M2000 Pillow Blocks, Oil Seals and Isolator Seals, Spherical Roller Bearings, Cylindrical Roller Bearings and Spherical Bushings.

Pillow Block bearings have to be a design that allows for easy and prompt replacement. The company offers a special solution to utilities - the Craft Split Roller block which allows for rapid replacement, and ultimately saves on downtime and costs. Emerson Bearing also recommends high end lubricants such as Kluber or Lubriplate for critical locations to better match lubricant service life to bearing B 10 life ratings. Both Inch and Metric shaft variations are available for next day delivery.

Failure Analysis

As part of their customer care, Emerson Bearing's industry experts provide clients with the unique service of "Bearing Failure Analysis" which helps them determine the cause of bearing failure so that they may prevent future failure and predict reliability. Or, if clients desire to do so, they can utilize the Bearing Failure Analysis program within the Technical Toolbox on the Emerson Bearing website.

To contact Rick Piracini in the Power Generation division directly, call 1-866-995-8765 or email rickp@emersonbearing.com.

The Emerson Bearing Difference

In a proud tradition, the same families that started the company in 1957 keep Emerson Bearing rolling by specializing in bearings for OEM and MRO markets across the country. Emerson Bearing has a staff of 22 and a 23,000 square foot facility to provide bearings ranging in size from 3mm to tunnel-boring 15-foot-diameter giants.

Emerson Bearing offers customers a one-stop shopping experience. With an online product

catalog with over 3 million bearings; a vast inventory of bearings; worldwide sourcing; a fixed price program; a knowledgeable staff dedicated to delivering; same day shipping and 24/7 service, Emerson Bearing has become the leading provider of bearings to OEM and MRO markets in the U.S. Emerson Bearing maintains headquarters at 201 Brighton Ave. Boston, MA. For more information, contact 617-782-1400 or toll free, 800-225-4587, email info@emersonbearing.com or visit www.emersonbearing.com.
