

## Action Bearing Incorporates New Division

Due to significant growth in the Pump, Compressor and Oil Field markets over the last couple of years, we've incorporated a new division to specifically cater to these customers.

Our customer care representatives in our new division are trained to accommodate the unique needs of pump, compressor and oil field customers. Emerson Bearing's 24/7 service and inventory is critical to the operations of many, in particular our Oil Field clients in the Southwest, South America and Russia.

Our knowledgeable team can assist in determining which bearing technologies would be most suitable by taking into consideration the specifications, recommendations, maintenance strategies, fatigue life and wear resistance of the bearing in relation to the application.

We can also provide Bearing Failure Analysis to determine the cause of bearing failure in order to prevent future failure and predict reliability.

**Richard Furtado**

## Your Sales Expert

Meet our Pump, Compressor and Oil Field Division Sales Expert, Richard Furtado.
