

Spherical Roller Bearings

For The Steel Processing and Recycling Industries

Heat Stabilized Components

- Operating Temperatures up to 392° F
- Reduces Expansion and Contraction During Changes in Temperature, thus Maintaining Proper Clearance and Shaft and Housing Fits

Two-Piece Machined Brass Cage

- Positive Roller Guidance for Cooler and Quieter Operation
- Two-Piece Cage Allows for Rotational Speed Differences Between the Two Roller Rows, thus Minimizing Skidding

Materials

- Forged Inner and Outer Rings Yielding Better Grain Structure
- Vacuum Degassed Steel for Longer Life
- Cage Material is Centrifugally Cast High Tensile Bronze

Large Selection of Upper and Lower Feed Roll Bearings and Main Rotor Bearings Including the Popular 14" and 18" Rotor Shaft Sizes

Spyder rotor that uses 23176K bearing

Disc rotor that uses 23192K bearing
