FOCUS POINT

We supply bearings for "everyday" applications. Pumps, such as those used in wastewater treatment facilities, can be found in virtually every industry as well as many households.

Pumps move liquids through pressure, and compressors, which condense and transport air/gas. Submersible pumps are commonly used to clear water from homes or offices. Sewage pumps are another type of submersible pump.

Pumps work behind the scenes and around the clock. Most applications utilize ball and cylindrical roller bearings. They are designed to withstand heavy radial loads, operate with low noise and vibration and have long service intervals.

We strive to provide you with the best products and service for your application, ensuring that you get the right bearing at the right price.

POWER DIVISION

We've launched a Power Generation Division dedicated to accommodating the unique bearing needs of utilities.

Our Power Generation clients include Coal and Gas fired Electric utilities stretching from the Northeast to Guam, Bermuda and the Caribbean. Rick Piracini, our Marketing Specialist and industry expert, oversees this division and assists clients in determining which bearing technologies

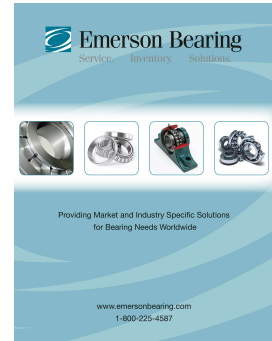

would be most suitable by taking into consideration the specifications, recommendations, maintenance strategies, fatigue life and wear resistance of the bearing in relation to the application.

Power generation requires uninterrupted bearing service. Our 24/7 service and inventory are critical to the operations of utility clients. The ball and roller bearings for the pumps, compressors, electric motors and drives must meet critical internal clearances, cage designs and Abec precision class. Our inventory includes Split Bearing Pillow Blocks, Cylindrical Roller Bearings, Ball Bearings, Type E Pillow Blocks, M2000 Pillow Blocks, Oil Seals and Isolator Seals, Spherical Roller Bearings, Cylindrical Roller Bearings and Spherical Bushings. Pillow Block bearings have to be a design that allows for easy and prompt replacement. We offer a special solution to utilities - the Craft Split Roller block, which allows for rapid replacement, and ultimately saves on downtime and costs. We also recommend high-end lubricants such as Kluber or Lubriplate for critical locations to better match lubricant service life to bearing B 10 life ratings.

Recycling Product News has included us in an article entitled "Bearing Company Finds Niche in Metal Shredding". Visit their website <http://rpn.baumpub.com>.

What Makes Us Unique

Our Bearing Detective

Online product catalog & comprehensive reference tool

Worldwide sourcing

One-stop shopping

Over 3 million bearings in stock ranging from 3mm to 3ft

Same day shipping

24/7 service

Fixed price program

OEM parts interchange

OEM and MRO experts
